IV International scientific and practical conference

**«ACTUAL PROBLEMS AND DEVELOPMENT PROSPECTS OF FOREST
INDUSTRY COMPLEX»**

Kostroma State University
Kostroma, Russia
September 8-11, 2021

Kostroma State University and Mytishchi Branch of Bauman Moscow State Technical University are holding the IV International **scientific and practical conference «ACTUAL PROBLEMS AND DEVELOPMENT PROSPECTS OF FOREST INDUSTRY COMPLEX» and the regular session** of the Regional Coordination Council of Wood Science on September 8-11, 2021 in Kostroma.

Kostroma region ranks 6th in terms of wood reserves in the European part of the country and is the most forest-rich in the Central Federal district, where it is the undisputed leader in terms of production of the timber industry. Currently, several investment projects are being implemented on the territory of the region to modernize the existing enterprises of the SVEZA group of companies for the production of birch plywood, the Segezha Group timber holding is building a new plant for the production of large-format plywood, and the Kronostar Company is reconstructing a plant for the production of wood boards.

Kostroma state University, which has been training engineers for the timber industry for more than 60 years, actively participates in scientific events of the Regional Coordination Council on Modern Problems of Wood Science. Three times, in 2003, 2012 and 2015, the University held visiting sessions of the RCCWS, including with the participation of foreign scientists. We hope that the next meeting on the basis of Kostroma State University will not only be a platform for the exchange of experience of leading scientists and industry representatives, but will also contribute to the further integration of science and production, the birth of new ideas and projects in the field of wood science and wood processing.
